Planting Seeds

Ukraine Planting Seeds Imports 2008

Approved by:

Ann Murphy, Agricultural Attaché
Office of Agricultural Affairs, U.S. Embassy

Prepared by:

Olena Pereyatenets, Agricultural Specialist

Report Highlights:

The import of various planting seeds into Ukraine is growing every year. This year it almost doubled compared to last year. The United States has a leading place as a supplier of the main field crop seeds entering Ukraine.

Includes PSD Changes: No
Includes Trade Matrix: No
Annual Report

Executive Summary

Ukraine's market for imported planting seeds was estimated at \$235 million in marketing year 2007-2008 with U.S. origin seeds capturing a 30% market share. Ukraine's planting seeds market is growing very fast, for example Ukraine's market for imported planting seeds was estimated at \$55 million in marketing year 2003-2004 with U.S. origin seeds capturing only 9% market share. Most likely, imports will continue to increase in MY 2008/2009 because of the increasing demand for quality seeds by Ukrainian farmers.

Seed Trade

Imports

Field crops take the major share in the imports; it amounts to 87% of the total imports. Out of 87% of the field crops share 52% belong to corn seeds and 30% belong to sunflower sowing seeds. The rest 18% is divided between wheat, barley, sorghum, flax and soybeans.

Corn seeds for sowing made up the biggest value in the field crops seeds imports. Corn seeds import totaled \$106 million in July 07-June 08 compared to \$60 million of sunflower seeds, \$29 million of rapeseeds and \$1 million of Soybean Seeds. Soybean seeds import share is small because of the low sown area in Ukraine.

Sowing Seeds Import into Ukraine

Sunflower Seeds

Imports of sunflower seeds for sowing are going up every year. The increase is from \$6.4 million in July 02- June 03 up to \$60 million in July 07- June 08. The largest share or 33% of imported seeds is coming from the U.S. This is explained by the developing sunoil crushing industry which builds strong demand for sunflower seeds in the country. Profitability of sunflower seeds is one of the highest among the field crops. It is stable already for several years and farmers demand for quality seeds is growing each year. Detailed information on quantity and value of sunflower seeds for sowing in Ukraine is in the statistical tables.

Soybeans

Market value of soybeans for planting is very small in Ukraine because of the low sown area compared to sunflower and corn, but it is developing. Imports of soybean seeds for sowing are going up as well as sunflower. The increase is from \$0.06 million in July 02- June 03 up to \$0.9 million in July 07- June 08. The major share 33% of the imported seeds is coming from the U.S. and the same amount is coming from Czech Republic. The detailed information on quantity and value of the soybeans seeds for sowing into Ukraine is in the statistical tables.

Rapeseeds

Area sown to rapeseeds has gone up rapidly for five years in a row. In MY 2004-2005 area sown was 104,000 hectares. In MY 2007-2008 area increased to 1.5 million hectares. The main exporters of rapeseed for sowing are Germany and France. U.S share is less than 1% and totaled \$0.1 million in July 2007-June 2008. The potential for the rapeseed for planting market is good because of the expected increase in sown area and demand for high quality seeds.

Corn

Imports of corn seeds for sowing are also going up. The increase went from \$9 million in July 02- June 03 up to \$106 million in July 07- June 08. The major share, 30% is captured by U.S. seed sales. The level of imports has gone up as Ukrainian farmers have begun to turn to more profitable crops. Profitability of corn production is high compared to other crops and that is why sown areas remain stable or slightly increased every year. Farmers demand for quality seeds is going up to insure better yields every year. Detailed information on quantity and value of the sunflower seeds for plating imported into Ukraine is in the statistical tables.

Import Procedures

Full information on seed variety evaluation, registration and release, seed certification, plant health regulations, variety approval and state field testing, and intellectual property rights protection is available on our web-site:

http://www.fas.usda.gov/scripts/AttacheRep/attache_lout.asp

Seeds of Genetically Modified Plants

The Prime Minister signed the Decree # 734, on August 20, 2008 regarding "The procedure on permits for testing non-registered GM organisms".

This is one of the supplementary decrees to the "Law of the State System of Bio-safety in Creating, Testing, Transporting and Using Genetically-Modified Organisms", which was adopted on May 31, 2007.

This decree #734 will come into force from January 1, 2009. The decree contains the procedure how to import GMO organisms (seeds), which are not registered in Ukraine for testing. It contains samples of the documents that must be submitted to the Ministry of the Education and Science to obtain permission to import and test. The permits are valid for 5 years. It takes 45 days to issue a permit if tests are made in a closed system. It takes 90 days to issue a permit if tests are done in an open system and are qualified to be safe for human consumption by the Ministry of Science. It takes 270 days to issue a permit if tests are done in an open system and are qualified to be safe for human consumption by the Ministry of Science and if the additional documents are requested by the Ministry.

The Ministry can refuse to issue a permit if the GMO is deemed not safe for human consumption or if not safe for the environment. This information will be placed on the Ministry of Science web-site.

If more information is required, please, e-mail: agkiev@fas.usda.gov
